# Quality Policy

MIDOR is a cutting edge oil refinery specialized in trading activities, purchasing crude oil and selling high quality petroleum products.

MIDOR's approach is to assign and monitor contractor(s) for operations and maintenance processes.

MIDOR strives to achieve the following:

Establish, maintain and continually improve an effective Quality Management System.

Meet the requirements of ISO 9001 standards, statutory and regulatory requirements.

Define and communicate the quality objectives throughout the Company in accordance with its strategic objectives.

This policy shall determine external context(technological, economic...etc.) and internal context (values,culture...etc.) that are relevant to Midor's purpose and strategic direction.

Focus on products quality aiming to meet the customers' requirements and ensure timely products delivery.

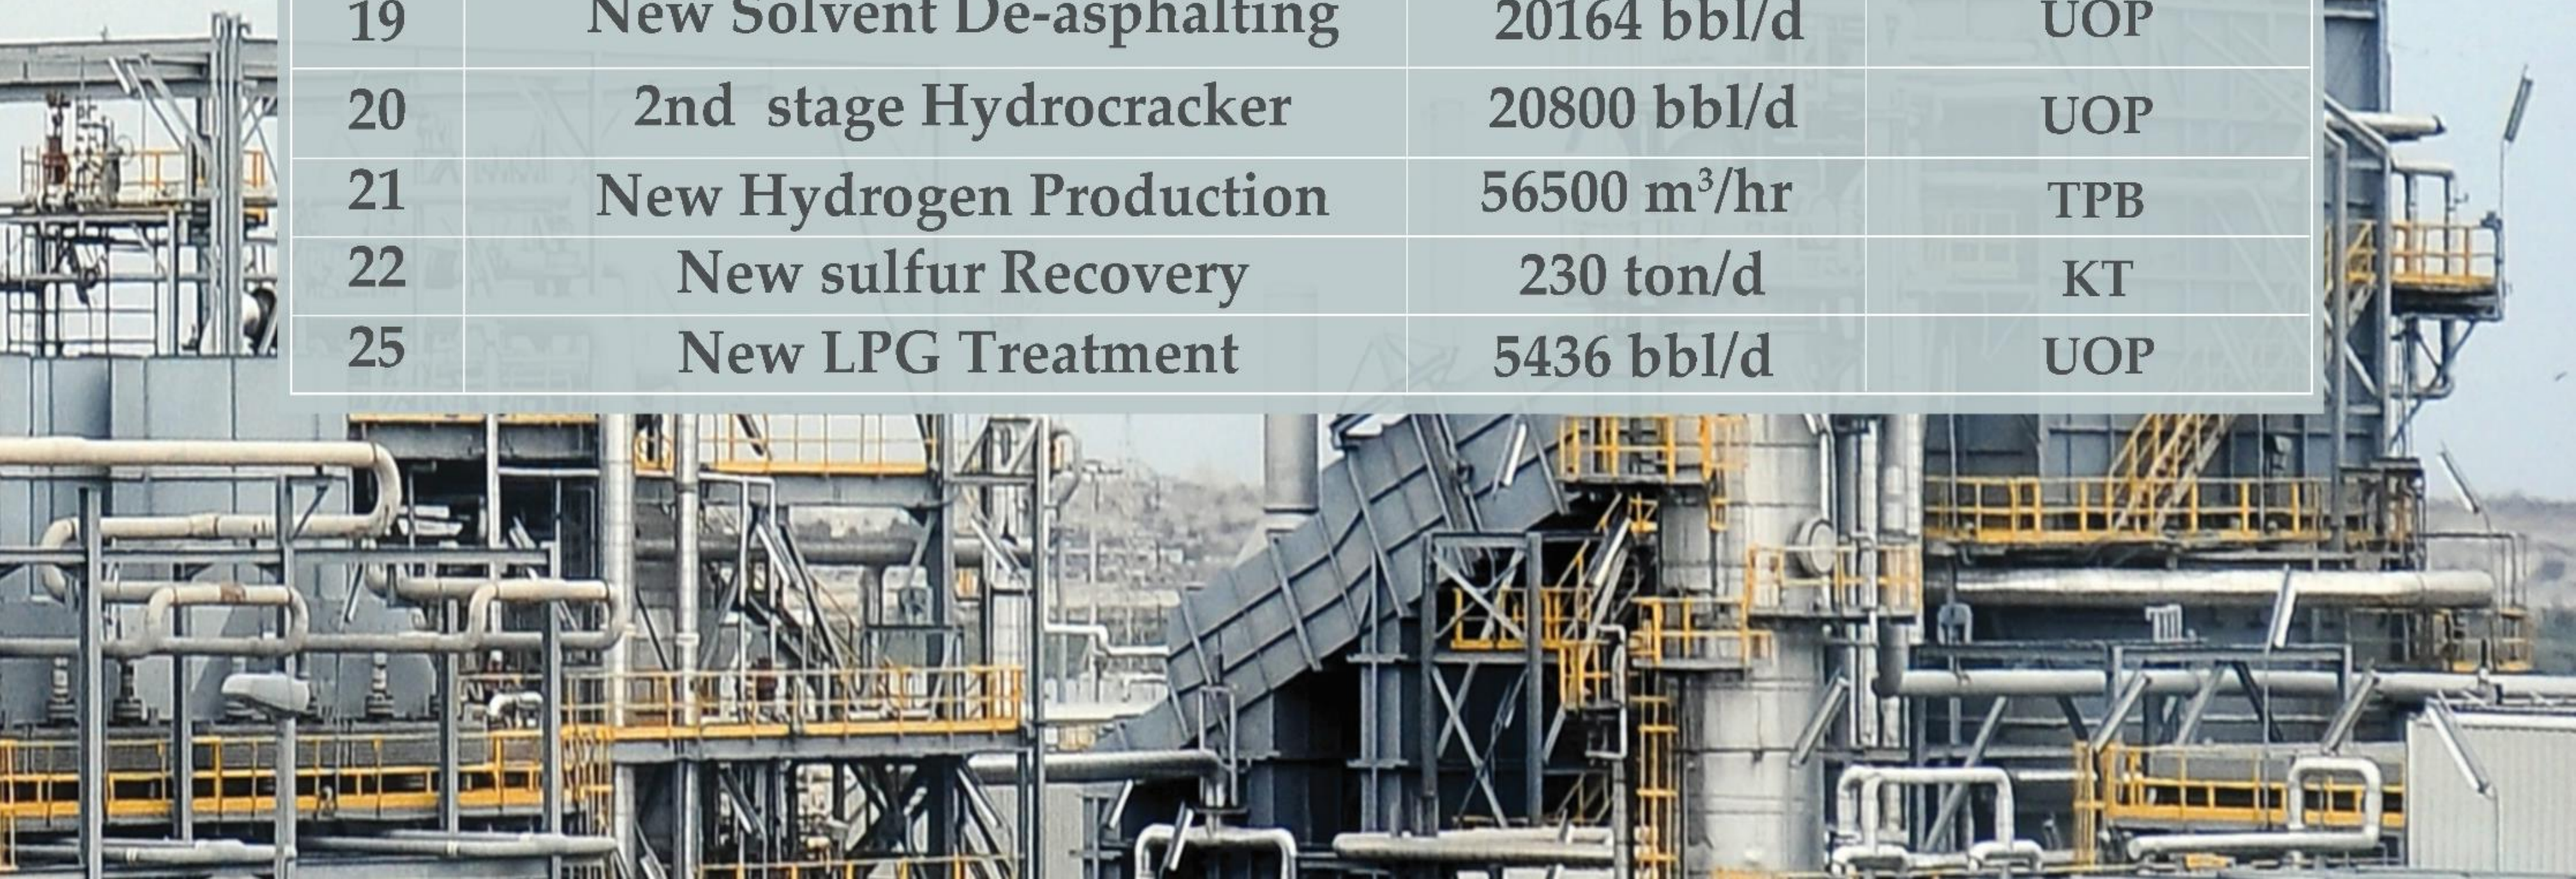

The quality policy shall be periodically reviewed to confirm its adequacy and effectiveness.

# Midor Process Units

Unit No.	Unit	Capacity	Licensed by
1	Current CDU/VDU	100000 bbl/d	—
2	Naphtha Hydrotreater	41994 bbl/d	UOP
3	Naphtha Splitter	44945 bbl/d	UOP
4	Continuous Catalytic Reforming	21889 bbl/d	UOP
5	Isomerization (Penex)	18242 bbl/d	UOP
6	Kerosene Merox	10150 bbl/d	UOP
7	Kerosene Hydrotreated	24002 bbl/d	UOP
8	1st stage Hydrocracker	54743 bbl/d	UOP
9	Current Hydrogen Production	64000 m <sup>3</sup> /hr	KTI
11	Delayed Coker	25669 bbl/d	Bechtel
12	LPG Recovery	1447 ton/d	—
13	Sulfur recovery	250 ton/d	KTI
17	New CDU/VDU	60000 bbl/d	—
18	New Diesel Hydrotreater	46343 bbl/d	UOP
19	New Solvent De-asphalting	20164 bbl/d	UOP
20	2nd stage Hydrocracker	20800 bbl/d	UOP
21	New Hydrogen Production	56500 m <sup>3</sup> /hr	TPB
22	New sulfur Recovery	230 ton/d	KT
25	New LPG Treatment	5436 bbl/d	UOP

# MIDOR Post Expansion Project

The Expansion project is the first Red Brown Green project in the world.

The Expansion project is a success story between the Egyptian and Italian governments to strengthen MIDOR capability to Reach 160 thousand barrels per day with a total investment of 2.7 billion USD, in coordination with Technip Energies (Italy).

Midor resources are currently wisely utilized.

The Expansion project was funded via international financial institutions, and MIDOR's resources.

The Expansion project implementation period was 4 and half years comprising miscellaneous activities summarized in: 77 million working hours, 15,000 workers, 54,000 cubic meters of concrete, 50,000 meters of pipelines, and 8,400 connection points.

Expansion project reached Provisional Acceptance by the end of 2024.

In line with the Egyptian Petroleum Sector policy towards social improvement quality life and within the company's commitment to achieving sustainable development goals within Egypt's Vision 2030, MIDOR is currently contributing in some governmental projects upgrading in several activities as follows :

-  Contribute to the treatment of some cases for workers and their families in companies dealing with MIDOR directly.
-  Organizing HSE awareness campaign for orphans and youth with disabilities.
-  Distributing several school bags equipped with fundamental stationery and winter garments to surrounding schools near the refinery site in Alexandria.
-  The company supports the health sector, as it provides financial support to the Supreme Medical Council for workers in the petroleum sector and the Housing and Social Services Fund.
-  The company contributes effectively to supporting presidential initiatives, as the company contributed to the "Haya Karima" Foundation, by planning the reconstruction and equipping many houses.

## Corporate Social Responsibility

# Health, Safety and Environment

MIDOR refinery is fully complied with HSE standards.

Consolidate the principle of safety at work and continuous review of the performance of safety system and risk management and achieving the main objective which is safe work environment.

Start a project to implement civil defense authority requirements, as per a plan end in 2026.

MIDOR is committed to applying quality international standards in Health, Safety and Environmental activities.

The main and sub-committee of process safety management were formed as per the EGPC recommendation. And the activity ongoing to setup the PSM system as per EGPC PSM standard.

Quantitative Risk Assessment (QRA) study for all refinery has been completed recently.

An initiative was launched to measure air pollutants and analyze groundwater well water inside the houses adjacent to the company in the western border. More than 50 houses were covered.
